Personal Lifestyle Survey 2025

Thank you for taking the time to complete this short survey. We worship a God who loves the earth he created and calls us to care for it. While it's important to take action together as a church, we also have an individual responsibility to take action in our daily lives so that we tread lightly on the earth and use our voices to speak up for nature.

Therefore we would like to know more about how your **faith influences your lifestyle**, about **how you care for creation** as individuals/household and **areas you would like to learn more about**.

Please rate the following statements

	Agree	Neutral	Disagree
I see **caring for creation** as a Bible-based response to worship our Creator God			
I see **reducing my carbon footprint** as a response to climate injustice (that climate change will affect the most marginalised the most greatly)			
I see **enjoying nature and enhancing biodiversity** as fundamental to my faith			
I see **what I consume and purchase** as having an impact on creation and my local and global neighbours			
I see that the **church needs to use her voice** to tackle the climate and nature crisis			

Do you have a response or any further comments about any of these statements?
